

Recently I started a business in the construction/renovation industry, Everyone knows that in this day and age, a good website is a must. It must be easy to navigate, rank well on the search engines, and have good visual appeal to potential clients. A good website is a vital tool for success.

After looking through the “sites4contractors” website, as well as some email and telephone correspondence, I decided I would hire Carl and his team for my web design needs. Through my various conversations it was obvious to me that I was choosing a very knowledgeable and detailed company. I considered building my own website with a free wordpress template, and I'm glad I decided against it. There is more to a good website than a few nice pics, and a couple paragraphs describing your services. You need your name to come up when someone is searching for a service provider. You need a professional.

The actual process was virtually painless, I sent Carl some pics, I wrote a description of my services and described to him how I wanted the site to function. The rest is history, my website is great.

It's been almost a month now since the website launched, I am on the first page for many of my targeted areas. I have received numerous calls and inquiries. In the first month alone I have signed 2 contracts worth over \$10,000. Plus I have a couple projects pending. This is all directly tied to my website. A pretty website is nice, but pointless if it doesn't make money. I feel that I have received an immense return on my investment.

I recommend “Sites4Contractors.Com” completely you won't be disappointed
